PROJECTS:

MINI PROJECT:

TITLE:	Hospital Management System
TOOLS: FRONT AND BACK END	Java, HTML, CSS, JSP, MySql.
DESCRIPTION:	The project deals with developing a web application for a Health center counters. Every sort of task is performed by the system, such as registering different types of persons (i.e employees, admin and doctor), enquiries, and complaints etc. reducing much paper work and burden of file storage.

MAIN PROJECT:

TITLE:	Smart Vehicle Parking
TOOLS: FRONT AND BACK END	Android Studio, IOT , Raspberry pi , python programming
DESCRIPTION:	In present day, cities finding an available parking spot is always difficult for drivers. For this problem we have an idea to present an IOT based cloud integrated smart parking system. A mobile application is provided that allows an end user to check the availability of parking space and book a parking slot accordingly.
